Date of birth: 09/07/1999 | **Nationality:** Turkish | **Sex:** Male | **Phone:** (+90) 5442591947 (Mobile) | **Website:** <https://github.com/gokhnesen> | **LinkedIn:** <https://www.linkedin.com/in/gokhan-esen> | **Military Service:** Completed | **Address:** İstanbul, Turkey (Home)

WORK EXPERIENCE

GEM YAZILIM

SOFTWARE DEVELOPER – 08/2025 – CURRENT

- Performed database operations using Entity Framework Core
- Applied the CQRS pattern in the project by separating command and query operations into distinct layers. Utilized MediatR for organizing command handlers, while queries were implemented through simplified, performance-oriented DTOs.
- Developed new RESTful services using .NET Core based on application requirements, and designed their corresponding user-friendly interfaces with Angular.
- Followed clean code principles to enhance code readability and maintainability.
- Designed dynamic features such as form validation, data listing, and filtering in Angular pages.

SARJ SEPETİ(FORMER NAME UNITED SOFTWARE TECHNOLOGIES)

SOFTWARE DEVELOPER – 04/2023 – 10/2023

Creating and Editing New Services in .NET Core Applications:

- Developed RESTful APIs to facilitate communication between different platforms and implemented CRUD operations.
- Utilized ORM techniques such as Entity Framework Core for database operations.
- Integrated JWT-based authentication and authorization processes to enhance application security.

UI Updates in Angular Applications:

- Designed modular, scalable, and responsive user interfaces using Angular CLI and Angular Material.
- Established communication with the backend through HTTP services to ensure dynamic data flow.
- Applied reactive programming techniques using the RxJS library to enhance application performance.
- Optimized application loading times using lazy loading and a component-based structure.
- Developed dynamic and validated form fields using form modules.
- Created custom pipes and directives to improve user experience.

LC WAIKIKI

INTERN – 13/06/2022 – 21/07/2022

I participated in the development of an employee tracking project using .NET Core and Angular.

- Integrated CRUD operations for employee management.
- Implemented logging processes by storing key information such as request & response, headers, tokens, and body data in Elastic, allowing for efficient data analysis.
- Carried out monitoring processes using Kibana to analyze system events.

SKILLS

C# | .NET / .NET Core | .NET Web API | .NET MVC | MsSql | Entity Framework | Git | Angular | TypeScript | SQL | Basic Docker knowledge | NoSQL (Redis, MongoDB) | ORM | REST API

EDUCATION

2018 – 2022

Computer Engineering, Düzce University

LANGUAGE

English(Intermediate)
